A10:	RESPONSE: KCATA wants a full and complete safety barrier to be installed by the contractor. It is KCATA's intent to purchase 25 barriers during the initial contract period. KCATA shall have the flexibility choice to order barriers where the order may

	<p>consist of so many # of Plexiglass material barriers, BRG material barriers, and/or BRP material barriers. The quantity of each type may vary from order to order. As stated in Addendum #3, added paragraph D, “BULLET RESISTANT ALTERNATIVE MATERIALS”, “Purchase of these alternative materials in lieu of utilizing the plexiglass shall be at the sole discretion of the KCATA.”</p>
Q11:	<p>For Bullet resistant glass/polycarbonate option what threat level of protection are you looking to stop: UL Level I, UL Level II, NIJ Level IIIA, etc?</p>
A11:	<p>Addendum #3 states, “Both options require a minimum level of protection that <u>shall withstand the impact and prevent the full penetration of 9 mm Full Metal Jacket with Lead Core ballistic firepower.</u> All other specifications and requirements for the safety barriers described in Section 2 “Scope of Work” remain the same and apply to the alternative material.”</p> <p>Based on that, this would be considered at a minimum Protection Level 1.</p>
Q12:	<p>Is low glare still a requirement, as I don’t believe it could be achieved with Bullet resistant options due to the light distortion through the material laminated layers?</p>
A12:	<p>Addendum #3 states, “Both options require a minimum level of protection that shall withstand the impact and prevent the full penetration of 9 mm Full Metal Jacket with Lead Core ballistic firepower. <u>All other specifications and requirements for the safety barriers described in Section 2 “Scope of Work” remain the same and apply to the alternative material.</u>”</p>
